7/13/2014	9:59-10:01	Lamlam	0	N/A	N/A	N/A	N/A	N/A		
7/13/2014	8:57-9:32	Chulu	N	CM	14CH03	N/A	N/A	55P0351198 1666679		Photos taken of nesting activity; Tracks in sand were not present when survey was performed and were therefore not measured. Yellow flagging ID 14CH03 tied to large Hibiscus tree 0.9 meters northeast of nest. Nesting activity occurred since last survey performed on 6/18/14. Several abandoned egg chambers (due to roots) present within same crawl activity ending in successful nest--abandoned chamber locations: 55P 0351210/1666695; 55P0351213/1666685; 55P 0351207/1666684; 55P 0351197/1666689.
		Chulu	N	CM	14CH04	N/A	N/A	55P0351253 99 1666744		Photos taken of nesting activity; Symmetrical tracks in sand present when survey was performed and were measured. Yellow flagging ID 14CH04 tied to elbow branch of Hibiscus tree 4.26 meters southeast of nest. Two abandoned egg chambers (roots) present within same crawl activity ending in successful nest--abandoned chamber locations: 55P 0351244/1666745 & 55P 0351248/1666745. Nesting activity occurred night before present survey, tracks were fresh with the most recent tide cycle. All previous body pits remain intact (no damage) despite regional beach erosion impacts incurred by Typhoon Neoguri waves experienced 7/4-7/5/14.
7/13/2014	9:36-9:43	Babul I & II	0	N/A	N/A	N/A	N/A	N/A

2014 data

TINIAN MIA MARINE TURTLE NESTING SURVEYS										
8/12/2014	10:06-10:25	Chulu	0	N/A	N/A	N/A	N/A	N/A	N/A	No new nesting activity recorded. Photos taken of beach driving evidence over nest # 14CH04; Multiple tire tracks in sand over body pit-photos taken & problem reported/emailed to DFW Tinian Director Richard Farrell. No hatching evidence was noted on any pre-existing Chulu nests during this survey.

9/14/2014	10:17-10:18	Lamlam	0	N/A	N/A	N/A	N/A	N/A	N/A	
9/14/2014	10:46-11:35	Chulu	0	N/A	N/A	N/A	N/A	N/A	N/A	No new nesting activity recorded. Hatching evidence was noted & nest inventories performed on 14CH03 & 14CH04 as part of DLNR annual rapid assessment. Photos taken of hatching rescued from chamber & DNA sample taken under CNMI DFW permit. It was also determined that nest 14CH02 had been poached previously.
