Hi Jenny,

I just wanted to follow up to see if NMFS has any further indication of timing of the green sea turtle CH proposal. If there is no update and the status remains the same as below, no problem. I just wanted to check in as the latest listing actions spreadsheet I have does not show the GST.

Thank you!

V/r, (b)(6)

Hi (b)(6)

Thank you for your email. The green turtle critical habitat designation is taking us much longer than first anticipated because of the number of DPSs (6) and vast areas of their ranges. We do not have an expected completion date at this time. Because we are required by the ESA to designate critical habitat, I'd like to continue to work with our DoD partners, as INRMPs are revised.

While reviewing the INRMPs, we've noticed that some address green turtle terrestrial nesting habitat, which falls under FWS jurisdiction, but most do not address marine habitat, which falls under NMFS jurisdiction. The types of issues NMFS would be concerned with would be: nearshore obstructions off nesting beaches (i.e., structures or activities that prevent or delay females from moving on and off nesting beaches and hatchlings from moving off nesting beaches), loss of seagrass or other foraging habitat, and offshore obstructions or activities that might block migratory routes between adult foraging and nesting areas. Please let me know if you have any ideas about sharing this information with all installations that include marine habitat of green turtles and that may be interested in an exemption. We do not have a biological report to share at this time, but we could give them some ideas of what we are looking for because I know that revising INRMPs takes a great deal of time and planning.

Thanks,

Jenny

Good Morning Ms. Schultz,

I am writing to follow-up on the status of the proposed CH for the green sea turtle. The latest listing POAM we have does not indicate an expected date. Can you provide any clarity on that timeline? Thanks in advance for your time!

Subject: [Non-DoD Source] Listing Spreadsheet.

Attached is the spreadsheet of classification actions now through the end of the calendar year. Note that Recovery actions are included.

FYI. I do not know if the 7 year workplan has ever been distributed. It is available online here:

https://www.fws.gov/endangered/improving_esa/pdf/Listing%207-Year%20Workplan%20Sept%202016.pdf
<https://www.fws.gov/endangered/improving_esa/pdf/Listing%207-Year%20Workplan%20Sept%202016.pdf>

It is also attached.

Regards,

Dave Harrelson
